Xero → Practical Stock Planner: File 5 – Supplier_Details (your supplier list)

Practical Stock Planner – Time-phased inventory planning. One short guide for one file. No IT skills needed – just a Xero login and Excel.

Checked: against Xero Central help pages (central.xero.com, Australian versions, read 2 Oct 2026) and in a live test in Xero's Demo Company (AU) (3 Oct 2026). **Tags: [T]** = tested on screen or in the exported file. **[V]** = checked against Xero Central (link given), not separately tested. **Not yet checked** = couldn't be tested in the demo company.

What this file is: one row per supplier. Practical Stock Planner shows these on planned supply orders and checks minimum order values. Columns: `Supplier Code`, `Supplier Name`, `Supplier Contact`, `Minimum Order Value`, `Currency`.

Before you start

1. **Download the Supplier_Details template** from the Practical Stock Planner sidebar (📥 *Templates*). Practical Stock Planner accepts **CSV files only** – one CSV file per input file; this one starts from `template_Supplier_Details.csv`. **Keep the template's header row exactly as it is.** After filling it in Excel, save it with **File › Save As › CSV UTF-8 (Comma delimited)**.
2. **There's no supplier export on the current screen** [T]. **Contacts › Suppliers** lists your suppliers, but its **Actions** menu has no Export option, and no CSV could be downloaded [T]. (Xero Central's *Export contacts* article describes a menu-icon › Export route [V] (Export contacts), but it wasn't there in the test.) Whether any other contact screen offers an export is **not yet checked**.
3. **So you type it in.** Most small businesses buy from a handful of suppliers, so this is quick. Type it once and keep it.

Steps

#	Step	Status
1	Go to **Contacts › Suppliers** – use the list as your checklist. (The **Supplier** column on **Purchases › Purchase orders** also shows who you buy from.)	[T]
2	Open each supplier you plan for, and copy the contact person, email or phone.	–
3	Type one row per supplier into the **Supplier_Details** template.	–

Column mapping

Practical Stock Planner column	What to type	Notes
Supplier Code	Your own short code (e.g. `BAYSIDE`) or the supplier name	Must be unique, and must match the *Supplier Code* in your SKU_Supplier_Details file exactly.

Practical Stock Planner column	What to type	Notes
Supplier Name	The contact name as shown in Xero (e.g. *Bayside Wholesale* in the demo) [T]	Blank → "Supplier TBC".
Supplier Contact	Person, email or phone – open the contact in Xero to copy it	Optional. Shown only on Planned Order Details, not on the Draft PO.
Minimum Order Value	The supplier's minimum order, if any	Blank → 0. It only marks lines Recommended Yes/No (a 0 marks every line No); it does not change order quantities.
Currency	The currency you buy in, e.g. `USD`	⚠ Blank → USD.

Checklist

- [ ] Template header row unchanged, saved as a CSV file (*File › Save As › CSV UTF-8 (Comma delimited)*).
- [ ] One row per supplier you buy stock from; no Supplier Code appears twice.
- [ ] Supplier Codes typed exactly the same as in your SKU_Supplier_Details file.
- [ ] Currency filled on every row (blank means USD).

If an upload fails: the message *"Please upload a CSV file... Save As CSV UTF-8"* means you uploaded an Excel workbook (`.xlsx`). Open it in Excel, choose *File › Save As › CSV UTF-8 (Comma delimited)*, and upload the `.csv` file instead.

Using Google Sheets instead of Excel? Save each file with *File › Download › Comma-separated values (.csv)*. To keep leading zeros, select the SKU column and choose *Format › Number › Plain text* before you type or paste SKUs.
